Full-time | Davis Campus | 1 yr (2 semesters)

FACULTY OF APPLIED HEALTH & COMMUNITY STUDIES

Animal Care

Sheridan's Animal Care program prepares you to work as part of a professional team in a range of animal-care facilities.

Train for a rewarding career in animal care.

Critical training

This program equips you with the skills you need to work in such locations as veterinary clinics, shelters, grooming businesses, wildlife rehabilitation facilities, dog daycare facilities, pet shops, zoos and other such animal facilities. This program is ideal for you if you have a technical interest in animals, are patient, conscientious, attentive to detail, highly motivated and dedicated.

What you'll learn

You'll study such subjects as animal anatomy, nutrition, domestic animal science, exotic animal science, animal grooming, animal nursing procedures and animal handling. You'll work with live animals under supervision to demonstrate and practice skills such as handling and restraint techniques, animal husbandry, feeding, grooming and veterinary simulation exercises.

Field placement

A popular segment of the Animal Care program is the two-week placement in an animal facility at the end of your second semester. This practicum gives you valuable front-line experience working with animals and observing their care.

Admission Requirements

Program Eligibility

Ontario Secondary School Diploma or equivalent, including these required courses:

- One English, Grade 12 (ENG4C or ENG4U)

plus one of:

- Chemistry, Grade 12 (C or U), or Chemistry, Grade 11 (U), or Biology, Grade 11 (C or U)

or

Mature student status.

Applicant Selection

Eligible applicants will be selected on the basis of previous academic achievement (the average of their six highest senior-level credits, including required courses).

Applicants who do not meet the admission requirements for this program will be assessed and advised individually and may be considered for other, related programs.

Articulation Agreement

Applicants who do not possess the necessary admission requirements to this program at Sheridan who complete the Pre-Health Sciences Pathway to Advanced Diplomas and Degrees program will be granted admission, contingent on space in the program (in the semester that they are applying for), if they have an overall GPA of 3.0 and a minimum of B grades in all their math and science courses.

Where space is not available in the semester for which an applicant has applied and the applicant meets all the requirements of this agreement, admission to a later intake of the program will be granted.

Applicants from the Pre-Health Sciences Pathway to Advanced Diplomas and Degrees program must also complete all other pre-admission requirements for their chosen program, such as criminal record checks, immunization documentation, etc. listed in the program admission requirements. All applicants to the Practical Nursing, Veterinary Technician, and Pharmacy Technician programs must also take the HOAE (Health Occupation Aptitude Exam) pre-admission test. Taking the HOAE is a requirement to meet the terms of the articulation; however, admission to the program is not contingent on test results at this time.

Prospective students should ensure that they meet the eligibility criteria for registration, such as English language proficiency in the program for which this transfer process is being applied.

Additional Information

Sheridan field placement agencies may require a current record of immunization. Please refer to the immunization information on Sheridan's website, or come in to one of the campus health centres.

As a candidate seeking a career in animal care you will find a strong background in sciences and math a definite asset. Because of the unique nature of Sheridan's program, it is strongly recommended that students acquire experience in the animal care field prior to admission.

Refer to the website for full admission requirements.

Career Opportunities
