Hands-on learning

We offer hands-on learning in one of Canada's leading Ceramics studios. Inspiring, dedicated faculty help you explore a full range of processes and techniques with an awareness of contemporary ideas and community. You'll learn innovative approaches to clay, such as wheelthrowing, handbuilding, moldmaking, slipcasting, clay/glaze formulation and firing salt/soda, wood, pit, gas and electric kilns.

Beyond the classroom

In Ceramics, you'll gain real-world experience and engage with the local and international community through professional events, workshops, competitions and exhibitions in galleries and museums. You'll build leadership skills through volunteering, fundraising and organizing initiatives. You'll participate in an internship and connect with renowned visiting artists and our large alumni network.

Get a foundation in all Craft and Design studios

Our program provides a collaborative, interdisciplinary approach to Craft and Design. You'll major in your studio of choice while building skills in the four other disciplines. You'll work with students and faculty from across all five studios on interdisciplinary projects that bring together a range of expertise and experiences to explore the potential of contemporary art, craft and design.
